1st strand cDNA was primed with a NotI-oligo (dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and ECOR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen. 4 GGGAGACGGACGTTGAGAGAAACGAGGAAGGAAGAAAAATGGCCGTCCACGGATTACAG Contact : Feng Liang Email : fliar http://fulllength.invitrogen.com/ Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalia; Eutheria; Primates; Catarrhini; Hominidae; Homo.

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Direct Submission

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a

1st strand cDNA was primed with a NotI-oligo (dT) primer. Five prime end enriched, double-strand cDNA was disted with Not I and cloned into the Not I and EcoR V sites of the pcMvSpORT 6 vector. Library was normalized, Library was constructed by Life Technologies, a division of Invitrogen.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               _

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Submitted (20-JUL-2004) Genoscope - Centre National de Sequence BP 191 91006 EVRY cedex - FRANCE (E-mail: seqref@genoscope.cr - Web: www.genoscope.cns.fr)

1st strand cDNA was primed with a NotI-oligo (dT) primer. Five end enriched, double-strand cDNA was digested with Not I and cinto the Not I and ECOR V sites of the pcwVSPORT 6 vector. Litwas normalized. Library was constructed by Life Technologies, division of Invitrogen.

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library
was normalized. Library was constructed by Life Technologies, a
division of Invitrogen. This sequence belongs to sequence cluster
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalla; Eutheria; Primates; Catarrhini; Hominidae; Homo.

Aurias,A., Delattre,O., Desmaze,C., Melot,T., Peter,M.,
Ploougastel,B., Thomas,G. and Zucman,J.
Nucleic acid corresponding to a gene of chromosome 22 involved
recurrent chromosomal translocations associated with the
development of cancerous tumers, and nucleic acids of fusion
resulting from said translocations

Sanger Institute name: pGEM.EWSR1
Homo sapiens cDNA sequence. This sequence was generated as part of The Wellcome Trust Sanger Institute program to isolate cDNA clones representing the full length open reading frame of well annotated protein coding genes on human chromosome 22. For more information see http://www.sanger.ac.uk/HGP/Chr22/.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Mammalia; Eutheria; Primates; Catarrhini; Hominidae;
